INTRODUCING THE

LUMI | HYDRA

The LUMI | HYDRA combines the standout features of the most popular facials with cutting-edge technologies.

This fully customizable device incorporates 17 highly effective techniques to cleanse, extract, hydrate, and tighten the skin. By addressing a wide range of skin concerns, LUMI | HYDRA ensures comprehensive care and leaves patients thoroughly satisfied with their rejuvenated, radiant skin.

ULTIMATE PATIENT SATISFACTION

Throughout the treatment, exfoliation eliminates dead skin cells, while pore clearance and infusion of antioxidant and peptide-rich serums occur. This revitalises the skin, providing a refreshed, deeply hydrated, and radiant complexion, ensuring your patients achieve their ultimate skin goals.

A COMBINED FACIAL SYSTEM FOR EVERYONE

A Facial Solution for Every Individual
The LUMI | HYDRA is both calming and invigorating, gentle yet potent, and adjustable to cater to the unique needs of all skin types. It provides instant, visible improvements without any downtime.

USER-FRIENDLY

Designed for simplicity, the LUMI | HYDRA offers an intuitive interface and clear instructions, effectively addressing common skin concerns through easy-to-follow steps for cleansing, exfoliation, extraction, tightening, and hydration.

A TAILORED APPROACH

The LUMI | HYDRA provides a revitalising facial experience aimed at promoting long-term skin health. This treatment can be completely personalised, utilising various techniques and specialised serums to address specific skin issues such as fine lines, wrinkles, hyperpigmentation, and blemishes.

15 INCH LED TOUCH SCREEN

With a modern, sizeable 10.4 inch LED touch screen that has pre-set specifications, you can benefit from a more user-friendly interface. The full touch screen interface enhances work freedom and screen visibility.

AESTHETIC DEVICES

17-1 TECHNOLOGY

The seventeen advanced applicators within the LUMI | HYDRA provide unique advantages to the treatment. While each component is highly effective on its own, their combined utilisation in a LUMI | HYDRA facial produces exceptional outcomes.

HIGHLY-BOUGHT AFTER

The LUMI | HYDRA is a sought-after treatment choice, renowned for its proven benefits in enhancing overall skin health and appearance. It provides immediate and effective results, ensuring patients return for continued sessions.

ENGINEERED IN THE UK

MULTIFORM APPLICATIONS

1. Hydra Dermabrasion - Effectively improve skin texture, eliminate wrinkles and quickly reveal new skin cell turnover. Hydra Dermabrasion helps treat many skin concerns from blemishes to dry and lifeless skin quickly and easily without any pain or discomfort.

2. Diamond Dermabrasion - This powerful handle removes dead skin cells and impurities, the powerful water absorbing technology can completely purify the keratin. Diamond dermabrasion promotes blood flow to the skin and helps produce collagen.

3. Skin Extraction - High frequency vibration removes dead skin and blackheads to cleanse the face and tighten the skin. This can be used in conjunction with LUMI | HYDRA products.

4. EMS Bi-Polar RF - EMS heats skin tissue to absorb large amounts of heat which creates new collagen and elastin, this in return tightens skin, delays skin ageing, dilutes fine lines and removes dark circles.

5. EMS Four Polar RF - Radio frequency waves enter the deepest part of the skin layers. The use of dermal collagen cellulose immediately produces a contraction principle at 45-60 degrees which can smooth wrinkles, tighten the skin and delay skin ageing.

6. Fractional RF (Round)

7. Fractional RF (Square)

8. Fractional RF (Body 1)

9. Fractional RF (Body 2)

10. Oxygen Spray - Professional spray enhances the absorption of essential oils by LUMI | HYDRA increasing skin performance and overall texture and appearance.

11. LED Light - Designed to rejuvenate and heal all skin types, LED light therapy aids with many skin concerns including blemishes, sun spots, fine lines, wrinkles and bacteria.

12. Ultrasound - LUMI | HYDRA releases frequency's of 1-3 million times per second, the process transmits to the face and body and absorbed by epidermis, dermis and subcutaneous tissue, the absorption of ultrasonic waves is converted into thermal energy, thermal effects of ultrasound, the living tissue temperature increased slightly 0.5-1°C, promote capillary function and fine inter cellular lymph flow, helps transport nutrients to the cells needed for blood vessels, promote metabolism and to assist the flow of lymphatic fluid reduction to maintain healthy skin.
